Education

- Faculty of Business, Alexandria University

2025

 - Bachelor of Business (Very Good)
- Abbas Helmy school -High School

2021

Experience

- Sigma Tech

Jun2024-Currently

 - Backend Expertise** – Specializes in PHP and Laravel, building and managing APIs, designing efficient database schemas, and implementing complex backend logic for modular applications.
 - Full-Stack Development** – Proficient in modern front-end frameworks like Next.js and Vue.js, ensuring seamless integration with backend systems for scalable and high-performance applications.
 - Innovative & Impact-Driven** – Passionate about contributing to innovative teams, delivering high-quality solutions, and creating systems that drive business success.
- Türkiye Company

Nov 2023-Jun2024

 - Backend Specialization** – Expertise in Node.js and Express, designing and managing APIs, optimizing database schemas, and implementing robust backend logic for complex applications.
 - Full-Stack Development** – Skilled in building enterprise-level dashboards with React.js and seamlessly integrating third-party APIs like Instagram and Facebook.
 - Real-Time Communication & Collaboration** – Developed a standalone live chat system using WebSockets and thrives in collaborative environments, taking full ownership of development phases to deliver scalable, efficient, and business-driven solutions.
- Mc Group

July2023-Nov2023

 - Backend Expertise** – Specializes in PHP frameworks like Laravel and CodeIgniter to build robust, scalable applications with efficient backend solutions.
 - Mobile App Development** – Successfully developed three food delivery apps using Flutter, ensuring smooth user experiences and high performance.
 - E-Commerce Solutions** – Designed and built multiple e-commerce websites, integrating modern backend technologies with intuitive front-end interfaces for seamless shopping experiences.
- Innces

Aug2022-July2023

 - Full-Stack Expertise** – Proficient in PHP and Vue.js, creating dynamic, efficient, and user-friendly applications.
 - Diverse Project Experience** – Developed a social media app with Ionic, an accounting system for financial management, and advanced hotel management systems.
 - ERP & Business Solutions** – Skilled in building ERP systems, delivering tailored software solutions to enhance business efficiency and operations.

Top Projects

Sightpaints

2024

Laravel Backend Development – Built a robust backend for an e-commerce platform specializing in paints, handling the entire architecture and authentication system.

API & Third-Party Integrations – Developed and managed APIs, integrating with MyFatoorah for payments and a third-party delivery company for seamless order processing.

Comprehensive System Design – Designed the complete database schema, ensuring secure authentication, efficient transactions, and a smooth e-commerce experience.

DFC

2024

Full E-Commerce Development – Built a complete e-commerce website using Laravel and Laravel templates, enabling wholesalers to place and manage orders.

Stock & Accounting Management – Implemented a robust system for tracking inventory and managing product finances efficiently.

Admin Dashboard – Developed a comprehensive dashboard for wholesalers to monitor orders, stock levels, and financial data in real time.

Dose Learning Platform

2024

Full Learning Platform Development – Built the backend and dashboard with Laravel, managing authentication, instructors, courses, and user interactions.

Real-Time Chat & Video Management – Integrated Pusher for live chat and enabled video uploads within the dashboard for seamless content management.

User Authentication & Session Tracking – Implemented authentication history to monitor and manage user login sessions for enhanced security and control.
